CALL FOR PAPERS

Humanitarian Technology: Science, Systems and Global Impact is being held on 12 – 14 May 2015 at Le Méridien Cambridge-MIT. Anchoring the renowned University Park at MIT, the conference venue is conveniently located in Cambridge’s vibrant innovation district, home to high-tech firms and leading academic institutions.

HumTech2015 will provide a forum for scientists, engineers, technologists, field workers and policy makers to showcase recent research and exchange technical ideas.

Technical sessions and technology and policy panels will focus on all aspects of technology, from science to systems, that have a global humanitarian impact. Conference tracks will be presented within an operationally-relevant context, drawing as much as possible from real-world experiences in humanitarian operations and logistics, disaster relief, emergency management, disease management, global health initiatives, international development, and other areas. This will be achieved through invited talks and panel sessions presented by current practitioners, including professional responders, service workers, and government officials.

Key Dates

**Paper Submission:
31 January 2015**

**Publication-Ready
Paper Submission:
28 February 2015**

- Humanitarian Assistance and Disaster Relief
- Health and Disease Management
- International Development, Poverty Alleviation and Food Security
- Public Safety and Emergency Management
- Emerging Technologies
- Water, Energy, Agriculture, Policy, Security, Education, ...

You are invited to submit papers in all areas of humanitarian engineering and technology development. Papers describing academic research as well as field work are encouraged.
